

Baby hammock

Yayita YABN-1

LA SIESTA baby hammock Yayita safely cradles infants enabling them to calm down by means of soft swinging. The fabric of the hammock keeps your baby in a snug environment that even fussy babies have been known to calm down in. Yayita is made of pure cotton from organic production. The filling for the

padded blanket is also made of cotton from organic production. The spreader bar is made of Indian acacia. Open and closed lying positions provide flexibility and make it possible to adapt the hammock to the needs of babies. Suitable for infants aged 0-12 months.

Cotton from organic production

Fair to human beings, fair to nature: Organic cotton is produced complying with ecological principles. An environmentally friendly alternative to conventional cotton.

Bamboo spreader bar

The spreader bar is made of cultivated bamboo. Thanks to its production in high quality plate technology, it has an exceptionally robust structure and a comfortably smooth surface. Bamboo is weatherproof and can be left outside all summer without compromising its stability. Its dark colour – which is a visual highlight as well – is achieved by a special heating process called caramelisation.

Padded surface

The padded surface increases lying comfort and protects from cooling.

Adaptable lying position

The lying position can be adapted according to need thanks to a patented system. For infants who need protection similar to the in-womb experience, the closed position is better suited. When babies grow older, many of them often prefer a more open lying experience.

Unbleached cotton

Unbleached cotton is exceptionally soft to the skin and thanks to less water and energy consumption during production it is also more environmentally friendly. No dyes are used.

Responsible forestry

The FSC® logo guarantees that the wood used in a product has been produced in compliance with the strict rules of the Forest Stewardship Council from sowing the tree via several processing steps up to the final product. FSC®-Licence Code: C012427
